

SALEM ELECTRIC
NEW LARGE SINGLE LOADS
Schedule 7

Applies to any customer who places a new or increased load on Salem Electric in any twelve- month period of more than ten average megawatts (87.6 million kilowatt-hours).

The rate for any New Large Single Load shall be equal to the General Service rate of general applicability, plus the difference between the charge to Salem Electric from the Bonneville Power Administration for the capacity and energy service, including losses, to a New Large Single Load and the charge which would apply if Salem Electric could obtain power to serve the New large Single Load at the Bonneville Power Administration's Priority Firm rate. In computing these amounts, a loss factor of 2% shall apply to any customer taking delivery at 34.5 kilovolts or above, and a loss factor of 4% shall apply to any customer taking delivery at lower voltages.

Effective 09/01/91
