

New Large Single Loads

Schedule 7: New Large Single Load

Effective 09/01/91

Applicable

Applies to any member who places a new or increased load on Salem Electric in any twelve-month period of more than ten average megawatts (87.6 million kilowatt-hours).

Rates for Purchase

The rate for any New Large Single Load will be equal to the General Service Rate of general applicability, plus the difference between the charge to Salem Electric from the Bonneville Power Administration for the capacity and energy service, including losses, to a New Large Single Load and the charge which would apply if Salem Electric could obtain power to serve the New Large Single Load at the Bonneville Power Administration's Priority Firm Rate. In computing these amounts, a loss factor of 2% shall apply to any member taking delivery at 34.5 kilovolts or above, and a loss factor of 4% shall apply to any member taking delivery at lower voltages.
