Get Your Home Snug & Tight*

Even if your home is newer there are still things you can do to make it more energy-efficient. Our SE energy analyst can help you decide which improvements will be the most cost-effective.

Listed below are the energy efficient measures we offer incentives for:

- Air Sealing
- Ceiling Insulation (R-49)
- Duct Insulation (R-11)
- Duct Sealing
- Electronic Thermostats
- Floor Insulation (R-30 or fill cavity)
- Replacement Patio Doors (.32 U-value)
- Replacement Windows (.30 U-value)
- Wall Insulation (R-13)

*(All non-electric heating equipment, excluding wood heat and non-electric heat pump backup systems, must be removed prior to weatherization).

Upgrade Your Heating System

If you improve the energy efficiency of your home to SE standards, you are also eligible to participate in the Heat Pump Program and receive an additional incentive for installing a qualified, high efficiency heat pump.

WeatherWise Residential Weatherization

Are you insulated from higher energy costs?

Get WeatherWise!

Your home will be less drafty, quieter, and cost less to heat and cool. Plus Salem Electric offers you a cash incentive to make it happen!

For more information call Salem Electric at **503 362-3601**, click on **SalemElectric.com**, or stop by our office at **633 7th Street NW**.

Do I Qualify for WeatherWise?

Yes, you qualify if you are a Salem Electric member whose home or apartment has permanently-installed electric heat.

The process is easy! Just call Salem Electric (SE) for your free energy audit. The energy audit will show you which energy saving measures will keep your home cooler in the summer, warmer in the winter, save you money, and increase your comfort.

Just follow these simple steps to receive incentives through the Salem Electric WeatherWise Program:

Request a FREE Energy Audit

A qualified SE energy analyst will audit your home and mail your audit results to you within 10 days.

Request Contractor Bids

Only one bid is required from a contractor on the Salem Electric approved contractor list. No bid should be accepted without an onsite visit from the contractor. All bids must be submitted on an SE Uniform Bid Sheet (provided in your audit folder or visit SalemElectric.com).

Call SE to Review Your Bid(s)

Before work begins, SE's energy analyst **must** review and approve your bid to set aside your project funds.

Installation, Inspection Process & Payment

The contractor will contact you to schedule the work. When SE receives an invoice from the contractor an energy analyst will call to schedule an inspection.

If corrections are needed, SE will notify the contractor and corrected work will be re-inspected to verify compliance. All corrections are completed at no cost to the owner or occupant.

Once the work passes inspection, SE will issue a check.

How Do I Know the Job is Done Right?

The work must be completed by a contractor familiar with our strict installation requirements, or you can do the work yourself, but the same specifications and requirements apply. After the work is complete our inspection process verifies that the installation meets all the program requirements.

Free Weatherization for Qualified Members

Members who meet income guidelines and have permanently-installed electric heat may qualify for FREE weatherization.

Salem Electric Incentives

Your audit will list which weatherization measures are eligible for incentives.

Salem Electric pays up to 50% of the actual cost to insulate your home or rental property, and \$5.50 or \$7.50 per square foot for replacement windows depending on the existing condition. In addition, if you have zonal heat you are eligible for a \$10 rebate for each electronic thermostat installed.

The incentive is not a loan. It is simply a payment to help you conserve electricity. Working together we can delay the need for new, more expensive energy resources.
